DETAILED ACTION

1. Applicant's amendment filed on 2/12/04 has been entered.
Claims 10-13 have been amended.
Claims 14-16 have been canceled.
Claims 17-40 have been added.
Claims 10-13 and 17-40 are pending.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 10 and 17-22 drawn to a process for viral inactivation by heat treatment classified in class 435, subclass 269.
 - II. Claims 11 and 23-28 drawn to a process for viral inactivation by filtration classified in class 435, subclass 286.7.
 - III. Claims 12 and 29-34 drawn to a process for viral inactivation by centrifugation classified in class 435, subclass 288.6.
 - IV. Claims 13 and 35-40 drawn to a process for viral in activation by detergent classified in class 435, subclass 262.

The inventions are distinct, each from the other because of the following reasons:

3. Groups I-IV are different processes. These inventions are different with respect to ingredients and method steps, which require non-coextensive searches; therefore, each process is patentably distinct.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1644

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
